

LAB-2

Q : Design Form of Student Registration and Employee registration with 11 fields.

TAGS USED	ATTRIBUTES USED	DESCRIPTION
<!DOCTYPE html>	—	Declares the document as an HTML5 document.
<html>	lang="en"	Root element of the HTML document and specifies the language as English.
<head>	—	Contains metadata and information about the HTML document.
<meta>	charset="UTF-8"	Specifies the character encoding of the document as UTF-8.
<meta>	name="viewport", content="width=device-width, initial-scale=1.0"	Makes the webpage responsive on different screen sizes.
<title>	—	Specifies the title shown in the browser tab.
<body>	—	Contains all the visible content of the webpage.
<h1>	—	Defines the main top-level heading on the webpage.
<form>	action=""	Defines an HTML form used to collect user input.
<fieldset>	—	Groups related elements within a form and draws a box around them.
<legend>	—	Provides a caption or title for the <fieldset> element.
<table>	border="1"	Creates a table with a 1-pixel border.
<label>	for=""	Defines a text label for an input element, helping with accessibility and click area.
 	—	Inserts a single line break.
<select>	name="", id=""	Creates a drop-down list for the user to select an option.
<optgroup>	label=""	Groups related options together inside a <select> drop-down list.

TAGS USED	ATTRIBUTES USED	DESCRIPTION
<input>	type, required, name, id, list, src, alt	Creates interactive controls to accept data from the user. The type attribute changes the input format (e.g., text, email, password, tel, number, radio, file, color, search, range, url, checkbox, date, month, week, datetime-local, time, image, submit, reset). required makes it mandatory to fill. list connects it to a datalist.
<option>	value=""	Defines a specific choice inside a <select> drop-down list or a <datalist>.
<datalist>	id=""	Specifies a list of pre-defined options for an <input> element with an autocomplete feature.
<button>	onclick="", type="", src="", alt="", height=""	Defines a clickable button (used to submit data or trigger a script).
<script>	—	Embeds client-side scripts (like JavaScript) within the HTML document.
<tr>	—	Defines a row in the table.
<td>	rowspan, colspan, style	Defines a table cell. rowspan merges rows, colspan merges columns, and style applies inline CSS such as background color.
	src="mu logo.png"	Displays an image. The src attribute specifies the image file path.
<p>	—	Defines a paragraph to display text.
<pre>	—	Displays preformatted text while preserving spaces and line breaks.
<!-- ... -->	—	Adds comments in the HTML code that are not displayed in the browser.

Final Outcome:

Employee Registration Form

Personal Information

EmployeeID :

Full Name:

Dob:

Phone NO:

Age:

Gender: ☐ Male ☐ Female

Upload Profile Picture: No file chosen

Contact Informations

Email Address:

Mobile No:

Alternate No:

Address:

Permanent Address:

Prefferd State:

Prefferd City:

Agree To Terms: ☐ I Agree

Employement Details

Date of joining:

Select shift:

Department:
